Important information

Wood

We offer our tables in various wood types such as oak and walnut. The oak is from Europe and the walnut is from the USA, except from the Pia Chair in walnut, which is made from European walnut.

Wild oak is the same wood type as normal oak, but with more natural structure, like knots and small cracks. These knots and small cracks are filled with black putty, while smaller cracks and shakes will be filled with natural coloured putty. The natural structure in the wood may contain shakes, colour irregularities, mirror, drying stripes (tree sap that will evaporate over time), and other natural surface structures.

Our smoked oak is a so-called semi-smoked oak, where the ready-made furniture piece is placed in a sealed container with ammonia for 72 hours. During this process, the ammonia attacks the tannins, which makes the wood change colour. The dark colour will enter about 1-2 mm into the wood and give it a beautiful dark character. The final colour depends on the content of tannins in the oak, since it is the tannins that change the colour in the oak. It is not possible to foresee the final colour and colour variation, until the furniture piece has been taken out of the container. Therefore, it must be expected that large as well as small colour differences may occur on smoked oak furniture. Both on each individual furniture piece and in comparison with other furniture pieces in smoked oak, e.g. several chairs from the same production lot.

Mirror

Shakes

Drying stripes

Special requests

We offer our tables in numerous sizes and with various custom-made features, like cut-outs for cable trays and other special requests. Please contact us for more information on options and prices.

Tree Table - extra length

Ten Table - extra length and width and cut-outs for cable trays

Tabletops

Solid wood is a natural material, which can be affected by changing humidity, direct sunlight, heating, etc. The thicker and wider sticks or planks, the more the tabletop will react, and small cracks and irregular surfaces may occur. The cracks most often occur in the winter months, when it is cold, and the air is dry. In most cases these cracks will contract again as soon as humidity is normalized, which often happens during the late spring.

The Tree Table is made of two full planks, and therefore cracks will inevitably occur at the end of the tabletop, and will not necessarily contract again. Some planks may also twist. Despite careful selection of the sticks, there will in most cases be differences between the sticks. Each individual table has its very own visual expression, and can therefore not be directly compared to other dk3 tabletops seen e.g. in a store or in a catalogue.

Extension leaves

We offer extension leaves in black MDF for all our tables. Some of the tables are also available with extension leaves in solid wood glued sticks. MDF is a form-stable and compact material, where small dustmarks may appear in the lacquered surface. Solid wood is a natural material, and therefore the extension leaves may bend while stored away. Therefore, we recommend storing the extension leaves, either with air around both sides or in an air-tight bag. The extension leaves in MDF will continue to retain the same width, which will rarely be the same width as the tabletop, since the width of the solid wood tabletop will constantly change according to humidity, sunlight, season, etc. The same applies for solid wood extension leaves with reversed glued sticks compared to the tabletop. For mounting of extension leaves, please see our assembly instructions and assembly videos on www.dk3.dk.

Surface treatment

Most of our furniture is available with different surface treatments. dk3 care kit containing surface treatment, a sanding sponge and our care instruction will be enclosed with the surface treated tables and sideboards. Please note that care kits are not available for lacquered furniture. For further information we refer to our care instructions and care videos at www.dk3.dk

Storage

Royal System®

Designed by

Poul Cadovius, 1948

Material

Shelves and cabinets: MDF veneer.

Drawers and rails: solid wood.

Hangers, self supports and keys: brass or stainless steel at the same price.

Treatment

Oil, soap. Oak and walnut also available in matt lacquer at the same price.

Note

The shelves may deflect slightly over time.

We recommend a max. load of 15 kg per shelf, in order to maintain a straight profile.

We recommend a max. load of 15 kg per drop-front for the cabinet with bar/desk drop-front.

Since brass is softer than steel, shelves w/ brass hangers will "warp" more than shelves w/ steel hangers.

New parts from dk3 are not compatible with old parts made before 1985.

For configuration of shelving combinations, please see our online configurator at www.dk3.dk

Seating

Pia Chair

Designed by

Poul Cadovius, 1959

Measurements

Measurements: B47 x D51 x H75 cm

Seating measurements: B47 x D42 x H45 cm.

Material

Frame: solid wood. Back: veneer.

Seat: Hand-woven paper cordel.

Treatment

Oil, white oil, soap. Mat lacquered not possible.

Note

Paper cordel is a natural product, which can vary in thickness. Variation in number of windings can occur.

The paper cordel is treated with soap and wax to make it more dirt repellent.

Light color differences between frame (solid wood) and back (veneer) can occur.

To prevent damage to the legs we recommend to mount felt or PVC glides. Cannot be purchased from dk3.

Seat	Oak	Black lacq. oak	Smoked oak	Walnut

Ten Table Rectangular width 95 and 105 cm

Designed by

Christian Troels and Jacob Plejdrup, 2019

- Tabletop** Solid wood, glued together, 3.4 cm thickness, sloping edge profile.
- Extension leaf** Solid wood, reversed glued sticks compared to the table, sloping edge profile.
MDF, black, sloping edge profile.
Extension leaves for length 200 cm cannot be mounted if the legs in the outer position.
L60 x W75 cm fits 200 cm
L60 x W86 cm fits 240-270-300 cm
L60 x W83 cm fits 340-370-400 cm
- Treatment** Oil, white oil, soap.
- Table height** 72 or 74 cm.
- Legs/Placement** Solid wood incl. adjustment screws. Legs width 51 cm. Depth 5,5 cm.
The tabletop is prepared for legs to be mounted at 2 or 3 different positions:
1) Placement of legs from the edge. **2)** Distance between legs.
